O.M.R.

SERRATURIERI DAL 1967

SECURITY FOR **FURNITURE**

Every detail in its place.

K Series: quality locks for cabinet doors and drawers.

K SERIES – LOCKS FOR FURNITURE

The K Series is fully compatible with industry standards, so it integrates easily into your furniture. The glossy finish completes the picture, with a clean, contemporary design that enhances the look of every cabinet door and drawer.

DRAWER UNIT LOCK

Glossy chrome finish · Removable rotor

Locks every drawer in a chest with a single key. Its mirror-bright chrome front makes security a style statement.

K163481

SLIDING DOOR LOCK

Push-button · Smooth, glossy finish

A simple push secures your sliding doors, while the smooth, glossy front adds a refined, fresh and luxury touch.

K165813

DOOR & DRAWER LOCK

Glossy chrome finish · Removable rotor

One lock for every door and drawer. Solid metal alloy body with sliding bolt and wafer mechanism, and a sleek front that is a detail worth noticing.

K220300

TALL DOOR LOCK

Rotating rods · Glossy chrome finish

Three-point central locking for tall cabinet doors: two hooks and a central bolt. The rods rotate rather than slide, for a stronger closure, while only the sleek front stays in view.

K240400

UNIVERSAL CAM LOCK

Reversible key · Glossy chrome finish

One of the most widely used locks in every sector, for furniture, metal doors, hatches and panels. The key goes in either way, a 90° turn does the job, and the wafer mechanism keeps it safe.

K165580

ROLLER SHUTTER LOCK

Side hooks · Glossy chrome finish

For rolling and sliding shutters: a compact, discreet lock with a reversible key and a minimal design.

K165754

ROLLER SHUTTERS 2

Spring hooks · Glossy chrome finish

Just push to close: the spring hooks lock automatically on shutters and sliding doors. Compact, minimal, elegant design.

K220357

ACCESS CONTROL KEYS

The right key for every role

A tiered system for access control: red extracts the rotor, blue is the master key, black opens only its own unit.

K-KEY

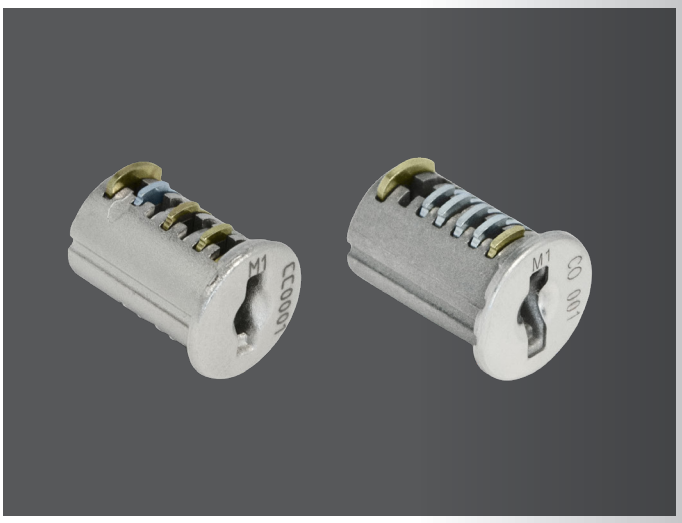

KNOB WITH ROTOR

Built-in rotor · Ergonomic grip

Rotor and handle in one: the knob fits most K Series lock bodies and gives an ergonomic grip to open and close.

K-POM

QUALITY ROTORS

Quick re-keying · Glossy finish

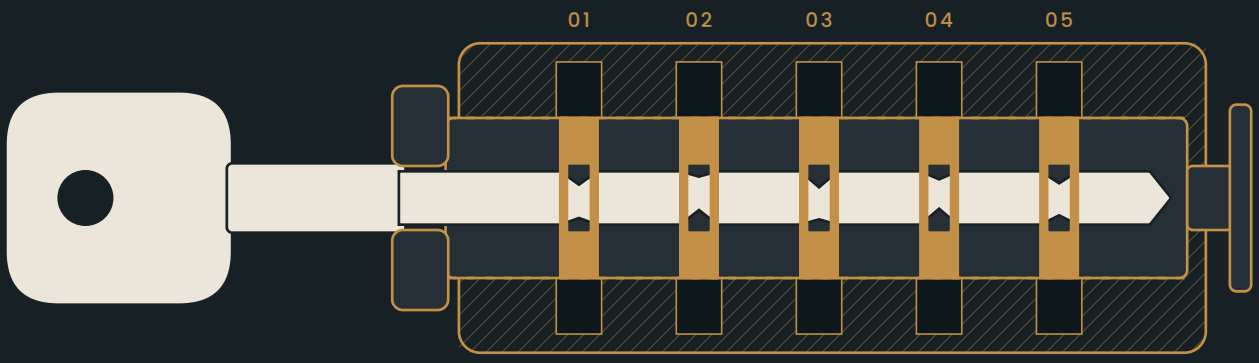

Fully compatible with industry standards. Extract the rotor with the red key to change the keying quickly and effortlessly.

ROTORS

WHY O.M.R.

FIVE PROMISES. **ONE KEY.**

A lock only opens when every wafer is in place. Working together is no different.

01 **Fast lead times**
Your production shouldn't have to wait.

02 **Reliable lead times**
